myShopCNC®

myShopCNC® is a universal remote monitoring solution that offers seamless compatibility with any machine brand, make, or model. With easy installation, supported integration, and no recurring fees, the system eliminates the complications and extra costs associated with OEM or competitive systems.

Customizable Dashboards

myShopCNC's intuitive dashboards enable data visualization based on customized customer requirements. Multiple data points provide a comprehensive overview of machine health by monitoring key metrics, like temperature, vibration, pressure, and flow rate.

Integrated Data Acquisition

Utilizing both wired and wireless components allows cnSEE to gather data from individual component sensors and machine operating status. This data is formatted for remote monitoring, providing a real-time view of system health and output.

Cost-Effective Monitoring

myShopCNC offers an all-in-one solution without subscription fees or the need for individualized coding. This streamlined approach avoids the complexity and high costs of custom data acquisition packages, making it a budget-friendly option.

Easy Installation

The system is designed for quick setup, with hardware installations completed typically within a day to eliminate downtime. Our team ensures efficient configuration of sensors, transmitters, and receivers, simplifying the process and minimizing downtime.

Proactive Alerts and Maintenance Insights

Engineers can set up the system to deliver early warnings of faults or malfunctions via instant messaging and/or email. These proactive alerts support predictive maintenance, helping prevent unexpected shutdowns and costly repairs.
