Here is what Quick Fix customers have to say:

"When I was made aware of this product, my question was: 'Will it perform as advertised?' After running field trials with it for over two years on logging equipment, I can look you in the eye and answer, 'Yes, it does!'"

- Larry Johnson, Logger

"One of my sons comes in, we've got something busted ... let's try one of these ... it's amazing! You wouldn't believe that they'd hold. They look like a piece of plastic, and it [takes] maybe 10 minutes to rig them up. We rigged that sucker up, and we've been using them ever since. I'm just telling it like it is: you need to try it. I promise you, they'll hold."

- Robert (Snake) Watson, Watson Dairy Farm

"We've been using the Quick Fix hose kit for two years. I've been really impressed with it. It means a lot to have something that you can fix in the field in 10 minutes and be back up and running with minimal tools. It's been a great asset in operations, and I'd highly recommend it to anybody that has a lot of machinery and has a need for something like this."

- Chad Craun, Dairy Farmer

"We're very happy with the Quick Fix hose kit because, in the operation that we have, we're working 24/7, Sunday morning, Saturday night, and having that product on-farm helps us keep things running, especially when you feed as many cows as we do. One of the things that I really like about it is it's quick. We have a hose bust, 10 minutes later we've got it fixed and running again, and it saves us a lot of time and money..."

- Randy Davis, Davis Brothers Dairy

"What I did ... for a temporary fix [initially], is put a hose [and fittings] on the machine. We're running ... lubricating oil [through an oil cooler], and it's been on there for four years now. I have no leaks, the hose has not been damaged ... and it's still on there today. It's still operating fine, and it's still under pressure ... and it was a 'quick fix' because we would have been down if I hadn't done that, for a very long time."

- Wayne Offermann, Factory Maintenance

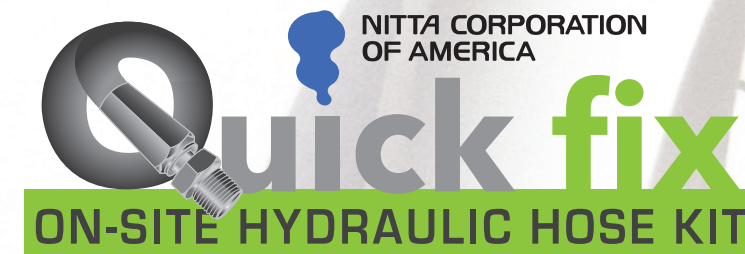

COST SAVINGS FACTS

- On-site repair by in-house personnel
- No service charge
- No emergency outcall fee
- No waiting
- No special tools or training needed
- Back in business in about 10 minutes

IT'S TIME.

Have more of both with Quick Fix:

APPLICATIONS AND INDUSTRIES

Quick Fix is the perfect field repair solution for hydraulic equipment operating at medium pressures throughout plants, machine shops and repair facilities:

- Manufacturing and production
 - Automotive
 - Petroleum
 - Chemical
 - Electronics
 - Food
 - Lumber
 - Aerospace
 - Mining
 - Telecommunications
 - Energy
- Hospitality industry
 - Hotels
 - Golf courses
 - Amusement parks
- Any facility where hydraulic equipment is used for production, transport or operations
