5. Firefighting measures

5.1 Extinguishing media

Suitable extinguishing media: Mist of loaded liquid, dry chemicals, carbon dioxide, fire foam, and dry sand are effective.

Extinguishing media to avoid: Use of straight stream of water can cause a risk of spreading fire.

5.2 Special hazards arising from the substance or mixture

Specific hazards arising from the chemical: In some cases of fire, may release irritant gases.

When burnt, may generate carbon monoxide and other toxic gases.

Fire fighting: Spray water to the surrounding facilities for cooling.
Keep unauthorized persons off the site of occurrence of fire and the surroundings.
Even after extinction, cool containers thoroughly with plenty of water.

5.3 Advice for fire-fighters

Special protective equipment and precautions for fire fighters: Wear fire resistant or flame retardant clothing.

Fight fire from windward direction while wearing protective equipment. If contact with skin is expected, wear impervious protective equipment and gloves.

Use air-breathing apparatus and protective clothing whenever necessary.

Wear protective equipment when working.
Remove nearby potential ignition sources immediately.
When mist is generated, use respiratory equipment to prevent inhalation of mist.
Do not touch or walk through spillage.
Pay attention to the site of spillage, which is slippery.

6.2 Environmental precautions

Avoid release to the environment.
Prevent spreading of oil spill with earth and sand, sandbags, or other proper materials and use care not to allow the oil spill to flow to street drains, sewer systems, and rivers.

At sea, install oil spill containment booms to prevent spreading of spills and absorb with absorption mat or other proper materials.

6.3 Methods and material for containment and cleaning up

In case of spillage in small quantity, collect spillage by absorbing with earth, sand, sawdust, waste, or other proper materials.

In case of spillage in large quantity, enclose with embankment to prevent spreading of spillage and collect spillage in empty containers to the extent possible.

6.4 Reference to other sections

In case of spillage, immediately inform the organizations concerned of the spillage to prevent possible accidents and spreading of spillage.

Remove nearby potential ignition sources immediately and make fire-extinguishing agents available. Remove spillage completely, and ventilate and clean the site and the surroundings.

7. Handling and storage

7.1 Precautions for safe handling

Technical measures: Keep away from any possible contact with sparks, open flames, and high-temperature materials, and do not allow release of vapor without justification.

Use pumps or other proper equipment for taking out from containers. Do not siphon with your mouth using a tube. Do not drink.

When mist is generated, use respiratory equipment to prevent inhalation of mist.

In case of vapor/mist dispersion, install a closed system, local ventilation system, and/or other proper equipment for the sources of vapor/mist generation.
